What Is Fluency?

© 2010 Readsters, LLC

Fluency Is More than Rate

Many people incorrectly equate reading fluency with rate (words correct per minute).

Fluency is a combination of accuracy, rate, and expression (prosody).

Hasbrouck & Tindal Fluency Norms (2005)			
50 th percentile (words correct per minute)			
GRADE	Fall	Winter	Spring
1	--	23	53
2	51	72	89
3	71	92	107
4	94	112	123
5	110	127	139
6	127	140	150
7	128	136	150
8	133	146	151

Fluency Practice Is Not a Substitute for Teaching Missing Foundational Reading Skills

© 2010 Readsters, LLC

Teaching Fluency Will Not Teach Missing Phonics Skills

- Automatic, accurate decoding is a pre-requisite for fluent reading.
- Teaching or practicing fluency will NOT teach decoding.
- Students with decoding weaknesses need both phonics instruction and frequent Oral Reading Practice.

Accuracy before Rate

© 2010 Readsters, LLC

Traditional WCPM Calculation Does Not Always Catch Accuracy Problems

- Consider two 2nd graders in January when the WCPM benchmark is 68+ WCPM:

Student	Total Words Read	Errors	WCPM	Accuracy
Billy	65	2	63	Billy's accuracy is strong.
Sally	81	9	72	Sally's accuracy is weak.

Billy is below the benchmark.
Sally exceeds benchmark.

- Sally's WCPM score is higher, but Billy is more accurate.
- Billy is more likely to comprehend what he reads.

readsters

© 2010 Readsters, LLC 7

The Goal Is Comprehension

When considering an appropriate rate, remember: "The Goal Is Comprehension"

- Low accuracy will often impede comprehension.
- Low reading rate does not always lead to poor comprehension.
 - Students who read at 90% of WCPM benchmark with recommended % accuracy often have strong comprehension.
 - Reading faster may help them finish faster, but they will not necessarily comprehend better.
 - Is this the best place for intervention resources?

readsters

© 2010 Readsters, LLC 8

Recommended Accuracy When Reading Aloud

- 100% when reading decodable text
- 100% when practicing for accuracy, without attention to rate
- 98% when reading for rate

readsters

© 2010 Readsters, LLC 9

Measuring Accuracy

- Accuracy is the percentage of words read correctly.
- If a student reads 50 words and either skips or misreads 3 words, he read 47 words correctly. His accuracy is 47/50 or 94%.

$$\frac{\text{total words correct}}{\text{total words read}} = \text{accuracy rate}$$

$$\frac{47}{50} = 94\%$$

readsters

readsters

Comparison of the New Approach and the Traditional Approach

© 2010 Readsters, LLC

New Approach: Students Read for Accuracy with No Timing

Traditional "fluency" programs	New approach
<ul style="list-style-type: none"> Reading rate is the primary measure, and students focus on speed. Errors may or may not be counted, but they are not the focus of practice. 	<ul style="list-style-type: none"> First, accuracy is the only measure. The students learn to read with 100% accuracy. Rate is not measured when students are practicing for accuracy. After students achieve accuracy goals, they often also achieve their rate goals.

readsters

© 2010 Readsters, LLC 12

New Approach: Goal Is to Read Accurately the First Time

Traditional "fluency" programs

- Students are expected to practice reading a text 3 to 5 times before they read for a final WCPM score
 - Students often get a WCPM score the first time they read, and practice so they can improve their score.
- After reading the passage for a final score, students begin practice on a new passage.

New approach

- Students read only a section of the passage.
- Their goal is to read the section with 100% accuracy (or achieving their rate goal) the first time they read the section.
- Students read the same section until they achieve 100% accuracy (or their rate goal).
 - Students move to a new section after they achieve their goal

readsters

© 2010 Readsters, LLC 13

New Approach: All Oral Reading Practice with a Teacher

Traditional "fluency" programs

- Students may practice:
 - by reading with another student
 - by themselves after or while listening to a recording of the passage.

New approach

- The teacher monitors all student practice.

readsters

© 2010 Readsters, LLC 14

New Approach: Practice is for "Accuracy" or "Rate" (not "Fluency")

Traditional "fluency" programs

- Fluency and Words Correct per Minute* are considered synonyms.

New approach

- Students practice to improve either accuracy or rate, but not both at the same time.
- Any student who reads below 97% accurately on an oral reading assessment practices for rate first.

readsters

© 2010 Readsters, LLC 15

New Approach: No More Fluency Practice

- Students are reading to practice ACCURACY or RATE.
- Students who read with less than 97% accuracy accuracy on an oral reading assessment practice for accuracy.
- Students who read with 97% accuracy or higher, but read at a rate lower than an established benchmark practice for rate.

readsters

© 2010 Readsters, LLC 16

readsters

Oral Reading Practice Is Different from Fluency Assessment or Practice

© 2010 Readsters, LLC

Procedures that May Be Different

- Students must ask for help on a word. "Help, please."
 - No 3-second rule.
- Always review errors before rereading a section.
 - Point to each word missed and ask student to read the word – assist as needed.
 - Help student practice saying words that are difficult to pronounce.
- When practicing for accuracy, there is no time limit.

readsters

© 2010 Readsters, LLC 18

The New Approach: Practicing for **Accuracy**

Key to Practice Page

Set 2 = Gr. 2 reading level

Passage 4 = 4th passage in Set 2

Section A = 1st Section on page
47 words = number of words in section

Set 2 ACCURACY

Passage 4 - ACCURACY

Section A
47 words

The moon looks like it changes shape over a month. After the moon is full, it gets smaller and smaller. In about fifteen days, we can't see the moon at all. Then it starts getting larger. At the end of thirty days, the moon appears full again.

Section B
32 words

When the moon shines, it does not give off its own light. The moon reflects light from the sun. The moon doesn't really get smaller or larger. It just looks that way.

Section C
33 words

The sun is always shining on one-half of the moon. The amount of light we see from the moon depends on where the moon, sun, and earth are. When we don't see any light from the moon, it is still in the sky. We just can't see the side that is getting sunlight.

Section D
29 words

The shapes of the moon have different names. The full moon looks like a white circle in the air. We see a full moon when the earth is between the moon and the sun. When the moon is dark, it is called a new moon. A new moon happens when the moon is between the sun and the earth.

© Readsters, LLC 2013

A Student Reads the Same Section Until He Achieves 100% Accuracy

- Each student has his/her own section to read.
 - No other student reads that section.
- A student reads the same section each time it is his/her turn until the section is read with 100% accuracy.
- Teacher reviews the errors with the student if score is not 100% accuracy.

How a Student Moves to a New Level (Set #)

- A student moves to the next Set # when he/she reads 3 sections in a row with 100% accuracy the first time each section is read.

When Does Practice Stop

- When the student reads 3 sections in a row, the first time, on a grade level passage.

What To Teach Students about Reading Aloud for Accuracy

- The goal is to read with 100% accuracy.
 - The student reads the same passage until achieving 100% accuracy.
- The student can re-read or self-correct, and those will be counted as self-corrections.
 - If the student has more than 2 self-corrections, he has to read the the section again.
- There is no timing and it doesn't matter how fast for slowly the student reads.
- The student should ask for help with words if needed.
 - NO 3-SECOND RULE. Wait 30 or more seconds before giving a student the word.

Accuracy Tracking Chart

- Before student reads, teacher writes passage information
- After student reads, teacher writes words correct and self-corrections
- Teacher writes accuracy percentage
- Student completes bar chart

You have a copy on **Page 3** in your **WORKING HANDOUTS** packet.

Readers to skip grade for repeats with 100% accuracy. All other sets require written correction from Readsters.

Marking Errors

- Slash (/) if students misread a word. (If you have time, write what the student read for any errors.)
- Slash (/) if student omits a word.
- Insert a caret (^) for inserted words.
- SC over any words students repeat or self correct.
 - If students repeat one or more words in a row, underline the words and mark all the words as one self-correction.
- Draw a line through the words if the student skips a row.
— Blah-blah-blah-blah

How Practice Works

- Each student has his/her own section to read.
- A student reads one time, then the next student reads. — This continues until time is up.
- A student reads the same section each time it is his/her turn until the section is read with 100% accuracy.
- The student moves to a new section after reading with 100% accuracy.
- The student moves to a new set after reading 3 cold reads in a row with 100% accuracy.

Scores To Get To Read a New Section on the Student's Next Turn

- 100% accuracy
- No more than 2 self-corrections.

Scoring

- Count all words the student misread or omitted as errors. (All words in a skipped row counted as incorrect.)
 - Mark the number of words correct on the student's tracking chart.
 - Self-corrections do not count as errors.
- Count all SCs (which are not errors).
- Self-corrections include words students repeat.
 - Write the number of self corrections on the student's tracking chart.
 - If the student gets more than 2 self-corrections, he does not get to move to the next section even if he got 100% accuracy.
- Calculate accuracy. Self-corrections do not count as errors.

Stop Oral Reading Practice When the Student Achieves 100% on 3 Cold Reads in a Row

- Each Set # is the grade level for the passage.
- If David is in grade 4, what set will be the final set he reads?

A note:

- Sometimes, we recommend that teachers continue one or two grade levels higher if students are able, just to give them a nudge for more difficult text.
- This is always the case when a student is in a combined phonics/ORP group and finishes his/her grade level before the other students finish.

The New Approach: Practicing for Rate

Which Students Practice for Rate?

Students who met the accuracy goal during Oral Reading Practice and still need help improving rate.

- When a student meet the goal of reading 3 sections in a row accurately with grade level text, that student can be assessed for rate.
- Most students read with a reasonable rate after practicing for accuracy, but some still need to improve their rate.

Students who read accurately on the ORF assessment, but read below benchmark.

readsters

© 2011 Readsters, LLC 31

Students Practice for Rate AFTER They Read with Accuracy at Their Grade Level

- The same goals apply.
- Students read a section until they read at the target rate and at least 98% accuracy, with no more than 2 self corrections.
- Students move to the next Set when they read 3 sections in a row, the first time, at their target rate with at least 98% accuracy and no more than 2 self-corrections.
- Students stop practice when they achieve the goal for sections at their grade level.

readsters

© 2011 Readsters, LLC 32

Each Student Has a Passage

Passage 1: RATE

Set 1: RATE

1. An insect is a certain kind of bug. All insects have a body with three parts, and they have three pairs of legs. Most, but not all, insects have wings. No insects have backbones. Instead, they have skeletons on the outside.

2. Insects are found all over the world. They make their homes in hot and cold climates. They live in forests, jungles, grasslands, and swamps. Insects are often found around ponds and streams.

3. We know of more than a million types of insects. There may be 5 to 20 million types. That means there are many insects we don't know about. We may never find all the types of insects.

4. Some insects you may know are ants, bees, and wasps. There are many insects you may not have heard about. The atlas moth has large wings, and the tips of the wings look like snake heads.

5. Only about one percent of insects can harm humans. The sting of a bee or wasp can hurt. Mosquito bites also hurt. A fly is also an insect. Like most insects, it is just a pest and doesn't hurt us.

- Each student reads for one minute.
- Time the reading.
- Mark errors the same way.
- Put a bracket () after the last word the student reads.

readsters

© 2011 Readsters, LLC 33

Completing Charts

The student will have a Rate Goal

1. Record Accuracy Percentage and students completes bar graph
 - If accuracy percentage is 96% or lower, the passage needs to be read again, no matter the rate
2. Record Words Correct per Minute (WCPM) and Self-Corrections
 - If more than 2 self-corrections, the passage needs to be read again
3. Student completes bar graphs for WCPM

Determining the Level of Materials To Start Student Practice

© 2011 Readsters, LLC

Determining the Passage Level and Rate Goal

- Start student's practice at a level that can be read with reasonable accuracy and rate.
- Establish a rate that will be reasonable to achieve.

What Assessment Is Needed to Determine Passage Level and Rate Goal

- One-minute Oral Reading Fluency
 - Rate score
 - Accuracy score

readsters

© 2011 Readsters, LLC 37

An Algorithm for Selecting Passage Levels and Rate Goals: 3rd Grade*

- Use **accuracy** and **rate** scores to determine a reading level that can be read with reasonable accuracy and rate.

Grade 3		
Accuracy	Rate	Grade Level for Passages
95% - 100%	60+	Grade Level
90% - 94%	45 - 59	2 nd grade
85% - 89%	30 - 44	1 st grade
75% - 84%	Below 30	decodable

- Use **rate** scores to establish a rate goal that will be reasonable to achieve.

Grade 3	
Rate on ORF Assessment	Rate Goal
70+	90
60 - 69	85
50 - 59	80
40 - 49	75
30 - 39	70
20 - 29	60

*Specific algorithms are developed for each school or district.

How Do I Get Passages for Practice?

© 2010 Readsters, LLC

Adapt Existing Passages for ACCURACY Practice

1. Find passages
2. Change grade level to Set #
3. Give each passage a number
4. Break passages into sections, give each section a letter, and count words in each section

Passage 4: ACCURACY

Section A
47 words

The moon looks like it changes shape over a month. After the moon is full, it gets smaller and smaller. In about fifteen days, we can't see the moon at all. Then it starts getting larger. At the end of thirty days, the moon appears full again.

Section B
22 words

When the moon shines, it does not give off its own light. The moon reflects light from the sun. The moon doesn't really get smaller or larger. It just looks that way.

Section C
33 words

The sun is always shining on one-half of the moon. The amount of light we see from the moon depends on where the moon, sun, and earth are. When we don't see any light from the moon, it is still in the sky. We just can't see the side that is getting sunlight.

Section D
39 words

The shapes of the moon have different names. The full moon looks like a white circle in the air. We see a full moon when the earth is between the moon and the sun. When the moon is dark, it is called a new moon. A new moon happens when the moon is between the sun and the earth.

Some Schools Adapt *The Six-Minute Solution* Passages for Both Rate and Accuracy Practice

Set 3 is on the last page in your Working Handouts packet

1. Break passages into sections, give the section a letter, count words in section.
2. Use number of words already on the passages.

Set 5

Name _____ Date _____

Passage 14

A Peter the Great was born on May 30, 1672, in Moscow. When he was
14 only seven old, he became the king of Russia. Russian kings were called
27 tsars. At this time, Russia was a very backward country. Peter decided to
36 travel to Europe to learn how to make Russia a more modern country. He
34 visited countries like England and Ireland. Peter brought back western ideas
65 to share with the Russian people. He introduced the European calendar
76 and alphabet to his countrymen. 36 Total

B He also showed new ideas about government, schools, and even clothes
92 with the Russian people. Peter built a new city in Russia and named it
106 St. Petersburg. St. Petersburg was modeled after some of the European
121 cities Peter had visited. Peter the Great was also a strong military leader.
136 He was interested in ships. He even built his own ship at the age of sixteen.
148 A Russian navy was created during his reign. 33 Total

C He went land on the Baltic Sea so Russia would have a place to
154 dock her ships. Peter also made the Russian army stronger. Peter the
168 Great was a popular leader with young Russians. He popularized music.
182 possible for him to do what he wanted without being overthrown. Some
204 historians think that Peter the Great was a wonderful leader. They give
216 him credit for making Russia a more modern country. 36 Total

D Other historians do not think that Peter the Great was so great. They
235 point out that Peter was a cruel leader. He tried to control the Russian
250 Orthodox Church. He seized the church treasury. Peter forced the older
263 Russian men to cut off their beards against church wishes. He made the
276 men in his court dress like Europeans and smoke pipes. Peter forced
288 Russian men, or dandies, to work in factories. Nevertheless, Peter the Great
300 is considered a national hero in Russia. The many monuments that were
312 built to honor him are still maintained. 34 Total

readsters

Major Benefit of the New Method when Compared to Traditional Methods

© 2010 Readsters, LLC

The Big Difference

- This oral reading practice has students practice accuracy without rate to develop a habit of accurate reading before practicing to improve rate.
- The goal is for students to read accurately on the *first* read, not the third or fourth read.

readsters

© 2010 Readsters, LLC 47

Summary

1. Fluency results when all other components of reading are in place.
2. Fluency instruction will *not* teach decoding.
 - Students who have decoding weaknesses need phonics instruction PLUS frequent oral reading practice.
3. Fluency is more than rate.
4. Accuracy is a critical component of fluency and should be measured.
5. Oral reading practice should focus on reading accurately or reading at a reasonable rate, so think in terms of "accuracy practice" or "rate practice".

readsters

© 2010 Readsters, LLC 48
