Improving Student Outcomes & Instructional Decisions

- 1 Who are your students? How does this inform your MTSS system?
- 2 How can you match teacher resources to your student need?
- 3 What are appropriate goals/targets?
- 4 How do you design professional learning to support a MTSS system?

Evaluation Tool*

Research-Based Reading Intervention Program Evaluation Tool

Science of Reading Aligned Intervention Evaluation Tool

The goal of a reading intervention program is to accelerate students reading below grade level toward literacy proficiency. To accomplish this goal, an intervention program should be aligned to the body of research now recognized as the Science of Reading. In addition to a strong alignment to the principles of the Science of Reading, efficacy assessments should be considered from other sources.

This evaluation tool will allow educators to assess program alignment to the following areas:

- Phonological and Phonemic Awareness
- Fluency
- Fluency
- Vocabulary
- Comprehension
- Building Knowledge
- Writing
- Assessment

Intervention implementation would include high-quality professional development designed to expand teachers' knowledge of research, assessment, and differentiation for students. Implementation would also include classroom support, ongoing instructional coaching, and data analysis.

To evaluate any reading intervention program, analyze the materials against the relevant criteria in the tables below.

| Criteria | 1 Score Partial Alignment There is some evidence of alignment to criteria | 2 Score High Alignment Materials explicitly align to and support the criteria |
|--|---|---|
| 0 Points No Alignment Alignment to criteria is not evident | | |

*Hard copies distributed at session

18

Table Activity

Place  next to the resources or strategies that **align** to your students' needs and SoR

Place  next to resources that you believe **may not** align to your students' needs or SoR

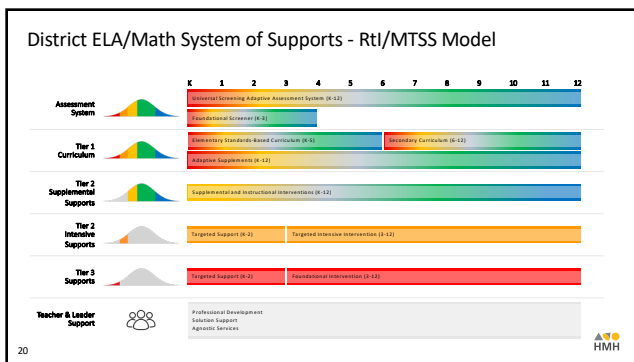

Circle  the solutions that teachers have the **most confidence** in deploying.

Next Steps

- How can we use our data and Coherence Map to plan for meeting the needs of ALL students?
- What strategies will help build capacity for all leaders to design instructional models for strong student outcomes?
- How do we use the intervention checklist and develop a strategic plan to move forward?
